

JOB DESCRIPTION

Nutrition Research Associate

About the role:

As Nutrition Research Associate, you will work with the team at the Cuddles Institute of Clinical Nutrition to drive research and content development. This position will report to the

Responsibilities:

- You'll write well-researched, evidence-based, and informative nutrition content for our website, blog, social media, and other platforms.
- You'll develop and pitch new ideas for nutrition-related content that align with our brand and target audience.
- You'll collaborate with our team of nutrition experts, editors, and designers to create visually appealing and engaging content.
- You'll conduct thorough research on nutrition topics and stay up-to-date with the latest research and trends.
- You'll use SEO best practices to optimise content for search engines.
- You'll edit and proofread your work, as well as the work of others.
- You'll ensure that all content produced meets our brand voice, style, and tone guidelines.
- You'll participate in CICN team meetings and contribute to the overall content strategy.

Must-Haves:

- Master or a PhD degree in nutrition, clinical nutrition or dietetics.
- At least 2-3 years of hospital experience (Pediatric nutrition or Oncology nutrition will be an added advantage)
- Strong research skills and ability to interpret scientific studies and research.
- Expertise in creating webinar content.

- Knowledge of statistical software such as SPSS or STATA will be an added advantage.
- Experience in creating educational material on an LMS platform will be an added advantage

This role is not for you if:

- You are not a self-starter who is used to working independently with deadlines
- You are not able to work without close supervision
- You need a team to rely on for operational tasks and activities

Skills:

You are able to interpret scientific studies and conduct research.

You are skilled at searching for, locating, extracting, organising, evaluating and using or presenting information relevant to a particular topic. This includes performing investigations, using critical analysis, and forming hypotheses or solutions to a particular issue.

You have strong critical thinking and analytical skills.

You are able to think rationally, which helps you analyse and interpret information and make connections. You are able to better gather and evaluate data and establish significance.

You write excellently with attention to detail.

You are able to communicate your message with clarity and ease to a far larger audience than through face-to-face or telephone conversations. You always write with your audience in mind, allowing you to decide on the medium to use. Your writing is able to keep the reader engaged and informed.

Experience in creating educational material on an LMS platform will be an added advantage
