

JOB DESCRIPTION

Nutrition Research Associate (Data Curation)

Experience: 2–3 years

Location: [Mumbai / Remote / Hybrid]

Project Duration: 2–3 months (extendable) Fulltime

About the Project & Role: We are looking for a Nutrition Research Associate to join a time-bound, research initiative at the intersection of clinical nutrition, oncology, and health technology.

The role is well-suited to someone with a strong academic background in nutrition or life sciences who wants hands-on experience in applied health research and an appetite to understand how evidence-based clinical practice translates into scalable health tools.

Must-Haves:

- Master's or a PhD degree in Bio-informatics/ Nutrition / Clinical Nutrition / Dietetics or Masters in Life Sciences/Biomedical Sciences. (Some course work in nutrition will be an added advantage)
- For candidates with a core nutrition degree:
 - 2–3 years of experience in clinical nutrition practice or hospital settings
 - Familiarity with pediatric nutrition or oncology nutrition is strongly preferred
 - Strong attention to detail and analytical thinking
 - Comfortable working with structured datasets and spreadsheets

Skills:

- Experience working in hospital nutrition departments
- Exposure to pediatric oncology patients
- Experience in clinical documentation or research projects
- Ability to interpret clinical guidelines and translate them into practice
- Interest in health technology or AI in healthcare

Personal Attributes:

We are looking for someone who:

- Is methodical and detail-oriented
- Is comfortable working with large datasets
- Can translate clinical knowledge into structured formats
- Is curious about the intersection of healthcare and technology
- Is comfortable working in a research-driven environment

Location: Mumbai/Remote

Open to remote/hybrid working modes. You may need to come into the office for meetings.
